

Speed Limit Device SLD type NK-80 implementation due type of pedal

	Type of throttle (accelerator) pedal	Type of fuel	Equipment package
1	Electronic (Voltage or PWM)	Any	SLD type NK-80
2	Mechanical (cable/rod type)	Diesel	SLD type NK80 + valve
3	Mechanical (cable/rod type)	Petrol GasDiesel(Dual Fuel System)	SLD type NK-80 + actuator (electromechanical type)

**SLD type NK-80 works with VOLTAGE and PWM (Pulse Wide Modulation) signals from Electronic Throttle (accelerator) pedal.**

**SLD type NK-80 works with VOLTAGE and PWM (Pulse Wide**

**Modulation) signals from Electronic Throttle (accelerator) pedal.  
SLD type NK-80 works with petrol (carburetor) engine and mechanical (cable) type throttle (accelerator) pedal.**
